DETAILED ACTION

Drawings

1. The drawings were received on 2-8-2005. These drawings are acceptable.

Response to Arguments

2. Applicant's arguments, filed 2-8-2005, with respect to the rejection of claims 14-15, 22 under 35 U.S.C 112 first paragraph, have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
3. The applicants further disagree with the examiner's reason for allowance. According to applicant, "that all claims are patentable based on the combination of element recited therein and not on any particular feature". The examiner clearly recognizes that that all claims are patentable based on the combination of element recited therein and not on any particular feature. In previous office action, the examiner states that the cited prior arts fail to disclose the step of providing a support structure over the lower subcell which has a lower band gap, and removing the growth semiconductor substrate in conjunction with all other limitations in the claims (emphasis added). The examiner never states that the reason for allowance only based on a single particular step or a single particular feature, without considering all other limitations in the claim.

Allowable Subject Matter

4. Claims 1-22, 43-44 are allowed.
